CAREER OBJECTIVE

Tech-driven Master of Computer Applications (MCA) candidate proficient in full-stack web development, backend logic, and database management. Adept at query optimization, schema design, and integrating REST APIs. Eager to contribute strong problem-solving skills and end-to-end software development capabilities to a collaborative engineering team.

TECHNICAL SKILLS

Programming : Java, Python, C, R.

Web : HTML, CSS, JavaScript, Bootstrap.

Tools/Concepts : Git, Github, Responsive Design, Basic Testing.

PROJECTS

Eye Disease Prediction

- Developed an automated deep learning pipeline using CNNs to classify common retinal conditions from optical coherence tomography and fundus images.
- Applied image preprocessing routines—including grayscale conversion, spatial filtering, noise reduction, and data augmentation—to improve model generalization.

Library Hub

- Built a responsive web portal featuring secure login/registration workflows, user authentication logic, and a dynamic dashboard interface.
- Designed structured web forms with client-side JavaScript validation to ensure data integrity prior to submission.

INTERSHIP

Digital Marketing & Salesforce Intern | Kurinji Technology

August 2025 – September 2025

Gained hands-on exposure to digital marketing workflows and Salesforce CRM processes, including customer data management, campaign automation, analytics tracking, and audience engagement strategies.

EDUCATION

Masters in Computer application

2026 – 2028 (pursuing)

RVS College Of Arts and Science, Coimbatore

Bachelors of Computer application

2023 - 2026

CardamomPlanters Association College, Bodinayakanur

LANGUAGES

Tamil

English
